### Summary

I have graduated with a degree in Cyber Business Management for my bachelor degree almost subject is focus on business not software development. However I'm falling in love with programming so I'm just still coding. My software development background is Web Technology. I spend a lot of time developing new technologies and learning something new also create few product for my need Someone call my job as a full-stack engineer because I can do server backend and front end. I quite familiar with Social network analytic and Bigdata. For business side I have an experience with international business partnership and investors relation with some country
